

# December

The girls had a busy month with Christmas exams and preparation for their Christmas play. This year's rehearsals were extra special as it was their first performance on the new stage in the Jubilee Hall.

On Wednesday the 20<sup>th</sup>, class 3 took to the stage to perform 'Children of the World'. The excitement was building behind stage as the curtains opened and all the practice paid off as the girls showed off their amazing acting skills.

## Santa Dash

This was a fun way to get active. It was a spectacular sight as an array of Christmas jumpers went running together. Even Santa who was visiting the school on the day joined in and went for a jog!

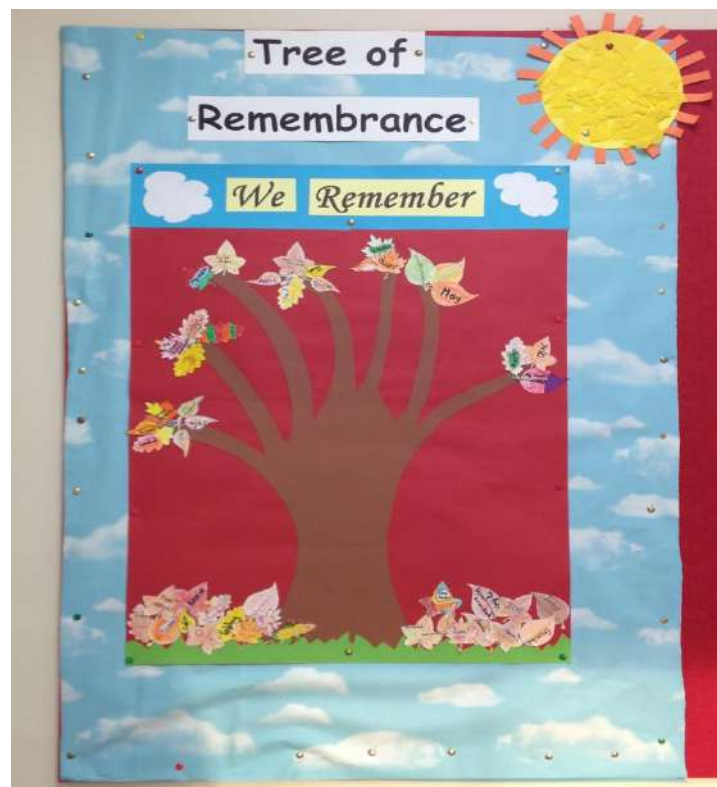

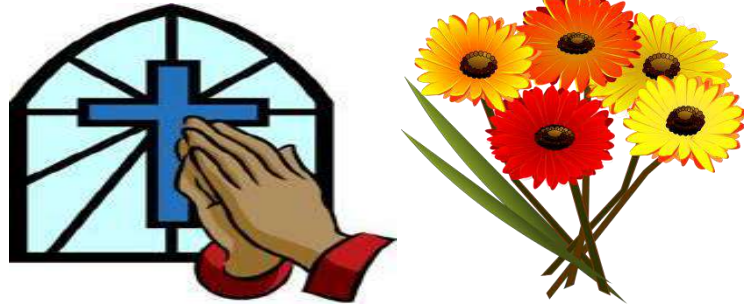

**Christmas Gift Bags for the Capuchin Day Centre!!**

**Class 3 were delighted to help get the bags ready for delivery!**

# November

## *November – A time to remember!!*

A prayer service was held in the school chapel to celebrate All Soul's Day. Class 3 remembered people who had died that were special to them. Each leaf on Our Tree of Remembrance represents a person no longer with us.

During 'Science Week', the junior scientists of class 3 presented many great experiments to the class. They learned all about friction, mixing liquids, DNA and many more interesting things while completing their experiments.

**Enjoying some measuring in maths and quiet time for reading!!**

This month during Art, class 3 improved their drawing skills while completing Self Portraits.

Our class plot had a makeover thanks to the hard work from some 'green fingered' volunteers. The wet and windy morning did not dampen the enthusiasm from class 3. The girls helped to get the soil ready and plant some bulbs and plants. Thank you to all the mums who volunteered their time!

A beautiful view!!

In science, class 3 learned about the skeleton.

They carried out an experiment to test how good their balance was. They also learned about muscles and how they help our bones to move.
